👤 PROFILE

I graduated from the Kiev Polytechnic University, received a bachelor's degree in information systems and technology. The subject of my study was databases, development, systems analysis, computer networks, IOT. I also studied frontend on my own, and took several training courses.

During my studying i combined work as an administrator in a skate shop. My responsibilities included working with customers, consulting, placing and sending orders, registering students for training.

For 2 years one of my main hobbies is filming. During the whole time of photographing, several vintage cameras and a huge pile of used film appeared in my collection. Every time I bring my ideas to life on camera and I'm going to develop in this and further.
